WORK EXPERIENCE

Badan Siber dan Sandi Negara

2016 - Present

Software Developer and DevSecOps Architect

- Developed and deployed multiple web and mobile applications, ensuring scalability, security, and performance optimization to support critical organizational needs.
- Led the implementation and management of containerized environments with Kubernetes, database clustering, and object storage, enhancing system reliability and high availability.
- Conducted security hardening, application testing, and CI/CD pipeline automation, ensuring secure, efficient, and continuous delivery.
- Provided technical support and user training to ensure smooth adoption and usage of the system.

PT. Indonesia Siber Integritas

2022 - 2023

Software Developer

- Developed cekreputasi.id a web-based Know Your Customer (KYC) application, enabling identity verification for individuals or businesses.
- Fully managed application hosting, mail servers, and related infrastructure to ensure high availability, security, and performance.
- Integrated Xendit payment gateway to facilitate seamless transactions and automated payment processing within the application.

PT. Akasata Cyber Technology

2024 - Present

Data Privacy and IT Security Consultant

- Advised on Personal Data Protection Law (UU PDP) compliance, covering regulatory and technical implementation.
- Conducted technical training on data protection, security awareness, and SOC best practices for PLN ICON+ and PLN EPI.
- Trained BOD and employees on cybersecurity risks and data privacy responsibilities to ensure compliance.
